Welcome to Poly Shapes, one of the nation's most capable manufacturers of polymer-based film products since 1969. At Poly Shapes, we don't limit our product to stock and standard issue. We explore potential; your need is a catalyst for our creativity. No request is too outlandish, no demand too extraordinary. If it can be made of plastic film, Poly Shapes will strive to deliver.

Poly Shapes Corporation is a custom manufacturer of printed and unprinted plastic packaging. Whether your needs are automotive, food, industrial, medical, promotional or retail; allow us to utilize our many years of experience along with various equipment and tooling to make bags for you. We make bags as small as your little finger or as large as a car seat cover. We offer single seal, double seal, single-pocket bags, multiple pocket bags, tape closures, headers, liquid tight bags, custom shaped bags, heavy duty bags, metal grommets, pouches made with laminated films, perfed bags on a roll, and many, many other types of bags. Contact us with your particular packaging needs and see how we can help you. We specialize in working closely with customers having new and challenging requirements. Making custom packaging is our forte.

Not all of our work is tailored to custom applications. We're also experts at producing and delivering those basic, more routine items. So you can feel just as comfortable calling on Poly Shapes when you need standard side seal and bottom seal capabilities for

everyday bags. But common or custom, the point is...challenge us!
We'll deliver your solution!
